

Missouri Northern Pecan Growers

We offer a unique product, unlike any pecans you have ever tasted! Our wild, American Native pecan trees were planted by God and the squirrels & these pecans are gathered from sustainable family farms, which do not use fertilizers or pesticides, allowing us to market both “pesticide free” and “Certified Organic” pecans.

We source only native pecans that have not been impacted by genetic breeding or commercial hybridization techniques. Our pecans are smaller, sweeter, and have a much smoother mouth feel than southern pecans. These little pecans, delivered shelled, are an excellent topper for salads or ingredient in any desert. And, they are excellent as a snack. Missouri Northern Pecan Growers, LLC is farmer-owned, so you can be assured of the care we put in our products
