

Produce Report

Produce- Onion stocks remain tight due to supply gaps that have occurred during the current major output area transition. Onion prices may remain elevated during the next week or two before turning downward. The June 1st US potato inventory was 11.2% less than a year ago but 1% larger than the same date in 2007. Idaho potato holdings as of June 1st were 11.7% smaller than last year. Steady to modestly higher potato prices are anticipated as the summer gets underway. Tomato shipments may remain light into July due to heavy precipitation earlier this spring.
