

## Missouri Northern Pecan Growers

Missouri Northern Pecan Growers, LLC offers a unique product, unlike any pecans you have ever tasted. Our AMERICAN NATIVE Pecans are gathered from sustainable family farms, which do not use fertilizers or pesticides. Some of our growers are certified organic, allowing us to market both “pesticide free” and organic pecans. We source only native pecans that have not been impacted by genetic breeding or commercial hybridization techniques. Our pecans are smaller, sweeter, and have a much smoother mouth feel than Southern pecans.

These little pecans, delivered shelled, are an excellent topper for salads, or ingredient in any dessert. And, they are excellent as a snack. Missouri Northern Pecan Growers, LLC is farmer-owned, so you can be assured of the care we put into our products.

Domestic pecan trees have always been here. In the early 1900’s, producers began to plant rows of hybridized pecans to improve orchard yield. And the industrialized Southern pecan industry was born. Here in Missouri, we do things differently. Our pecan industry has evolved around native varieties indigenous to our surroundings and planted at random by God and the squirrels. We source our AMERICAN NATIVE Pecans from our own farms, and from neighboring farms. Some of our pecans come from trees that are over two-hundred years old. They were producing when George (Washington) was president!
