Sysco has established an industry leading market action notification process to notify all our business-to-business customers, as well as some consumers to whom we have sold product directly and for whom we collected contact information.

This posting does not replace our normal industry leading market action notification process. Instead, it is intended to provide an additional, approved channel to notify end consumers who purchased product from Sysco, but did not provide the Company with contact information and thus cannot be reached via our normal market action notification process.
